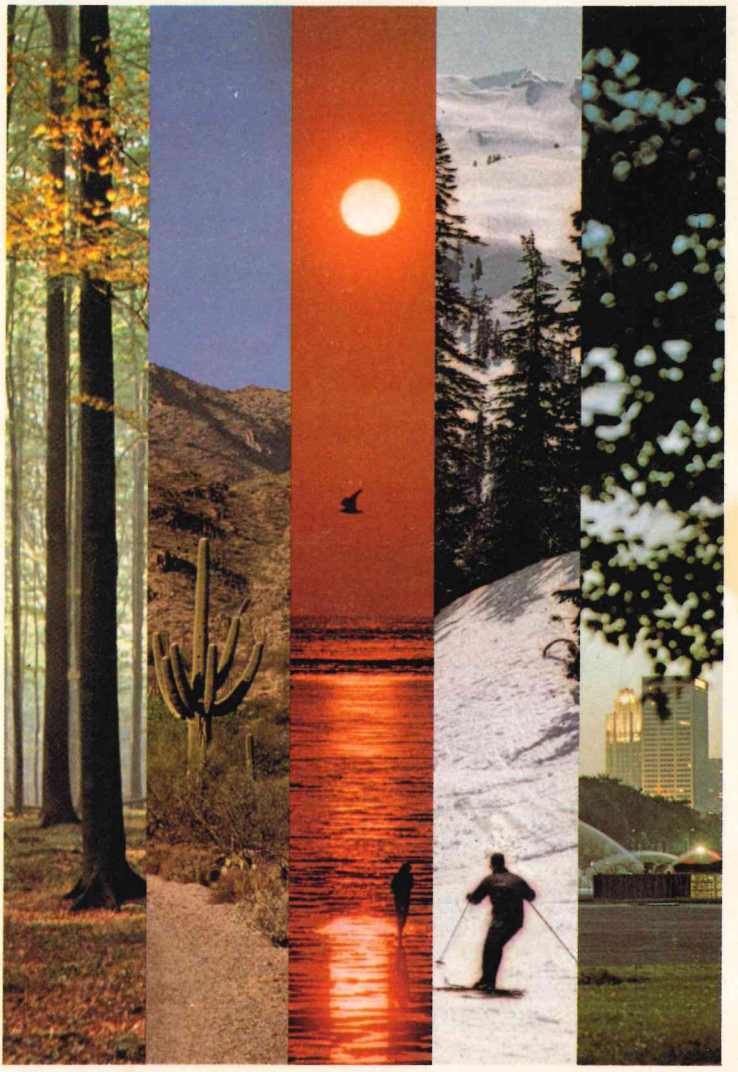
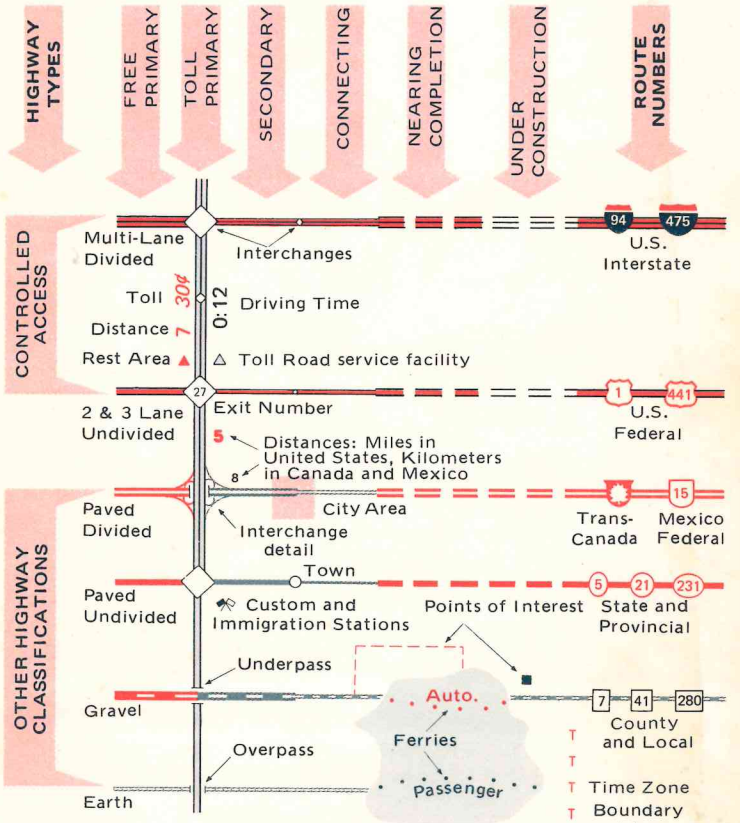
Triptik®



AMERICAN AUTOMOBILE ASSOCIATION

STRIP MAP LEGEND

A few moments spent in familiarizing yourself with the symbols reproduced below will reward you with a better understanding of your Triptik Routing . . . and a safer, smoother trip.



TRIPTIK ROUTING DISTANCES

To compute overall distance for your specific Triptik routing, combine the red cumulative figures appearing in the margins of regular Strip Maps with the figures shown in red on the City or Area Maps.

EXCLUSIVE TRIPLE-A SYMBOLS AND FEATURES

AAA recommended lodging and dining facilities can be located by checking TourBook listings for community names printed in RED on the maps.

SERVICES AVAILABLE AT INTERCHANGES IN RURAL AREAS

- G — GAS — At least one station
- F — FOOD — Listed Dining Facilities
- F — FOOD — Other Family Type Restaurants
- L — LODGING — Listed Overnight Accommodations

OTHER CROSS REFERENCES TO AAA BOOK PUBLICATIONS

- AAA CLUB—Located in the community so designated and listed in the appropriate AAA TourBook.
- PLACE OF INTEREST—Descriptions are included in the "What To See" section of the appropriate AAA TourBook under place names associated with this symbol.
- CAMPGROUND—AAA recommended camping facilities are listed in the appropriate AAA Camping directory under place names located near the tepee symbols.

Copyright AAA MCMLXXVI – Printed in U.S.A.

Using your Triptik

Your AAA Triptik, a detailed, individually tailored routing is the backbone of the Triple A travel package. The clear and informative strip maps answer the needs of today's motorist on today's—and tomorrow's—highways.

Meaningful use of color and easily identified symbols key communities on the strip maps to the appropriate AAA TourBook or directory. If a town name appears in red, you know that Triple A approved overnight accommodations or dining facilities are available. A refers you to the points of interest section of a TourBook or a indicates the Camping and Trailering Directories. The lets you know there is a Triple A club waiting to serve you.

Strip maps also solve one of the major problems of traveling controlled-access highways: Where is the next gas station, restaurant or motel? Symbols inform at a glance of the availability of gas or AAA-approved lodging at interchanges, as well as the location of rest areas along the primary route. A indicates that there is a AAA-recommended restaurant near the interchange. The means that although there are no TourBook listings, one or more "family type" restaurants are located there.

An interesting feature of the strip map is the circular map on the inside. Reproduced from Triple A's state or regional maps, it depicts the relationship of your particular route to the surrounding area. By providing a broader view of the countryside and offering the opportunity to deviate easily from the marked route, it invites you to take sidetrips to nearby points of interest.

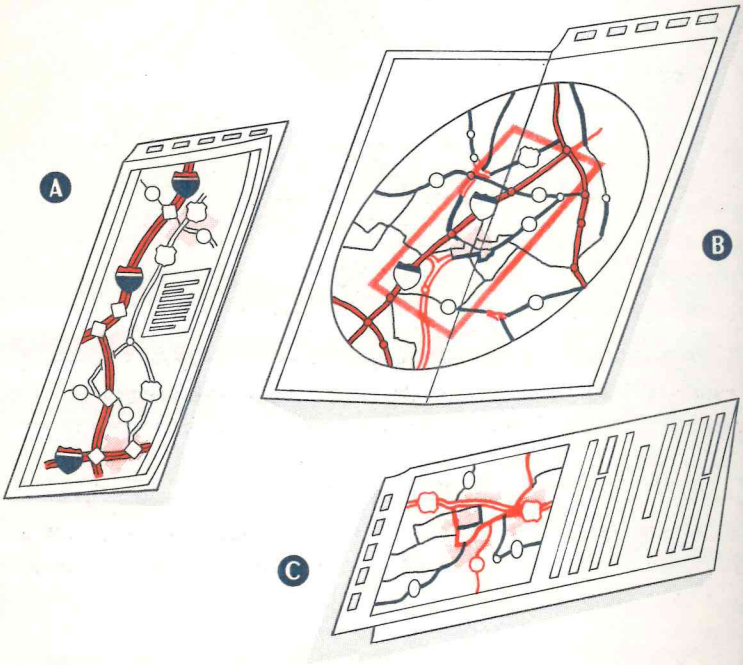
Have a safe and pleasant journey. We hope this AAA Triptik will add to the enjoyment of your trip.

76-12 Printed in U.S.A.

BASIC FEATURES OF AAA STRIP MAPS

There are three basic types of AAA Strip Map units: Regular, City or Area and Approach maps. Each contains four pages of information. The general features of these maps are discussed below to give you a better understanding of your Triptik and how to use it.

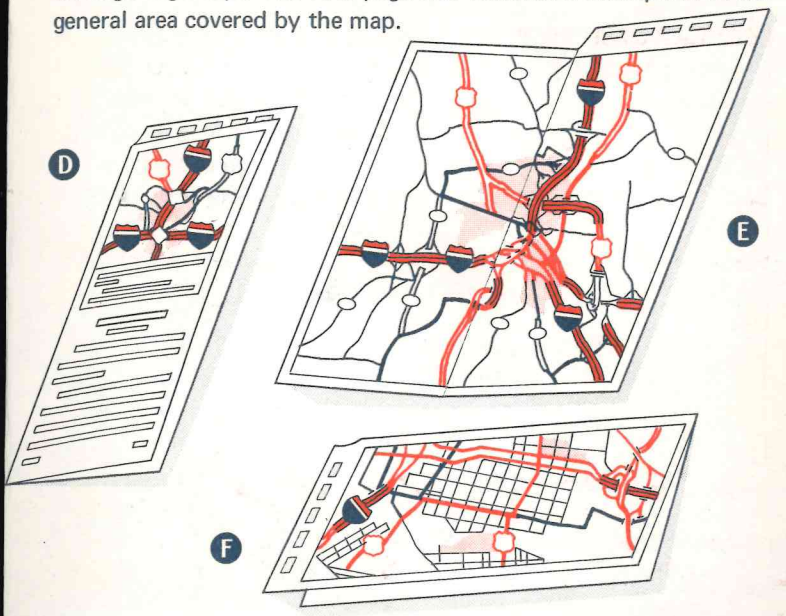
REGULAR STRIP MAP The front page of the unit, as shown in illustration Ⓐ, highlights a section of a through, cross-country route. The terminal cities or junctions for this section are indicated at the top of the map. These drawings show the necessary highway detail so you can follow each portion of the route with ease. An inset furnishes a brief description of the route(s) and provides figures for driving times and tolls. Cumulative mileage figures are shown along the margins. In addition, connections to other highways and, in some cases, important parallel routes are shown.



The circular centerfold area map, Ⓑ, on the second and third pages, shows the countryside in the general area surrounding the major route. These maps may be used for routing off the major highways shown on the front page strip map. As an aid to orientation, north is always at the top of the circular map. A rectangular outline on this map indicates the general area covered by the detail on the first page.

The back page usually contains outline maps of medium and smaller cities along the major route, Ⓒ. These thumbnail sketch maps show the detail for travel to or through the communities, as well as main streets within the city.

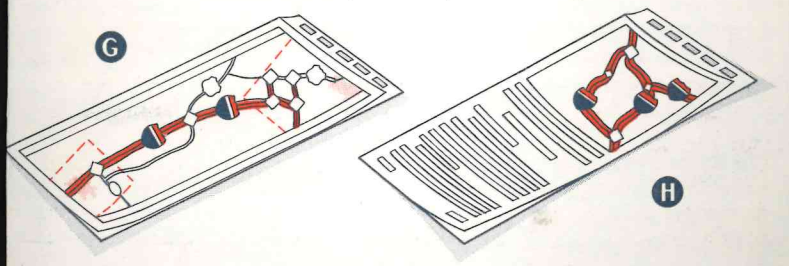
CITY or SPECIAL AREA STRIP MAP Similar in general format to the regular maps, these special units are used in the Triptik whenever the routing goes through or into a major city or recreation area. The first page "Thru" map, Ⓓ , is designed to help you travel through or to bypass the area. It shows only major through highways. The first page also includes a description of the general area covered by the map.



A centerfold vicinity map, Ⓔ , on the second and third pages presents a larger scale picture of the city or area. It provides as much detail as the scale will permit and is intended for driving on main thoroughfares within the city or area.

The back page, Ⓕ , contains downtown or special interest maps.

If a city or special area map adjoins a regular strip map, the red dashed outline at terminals of the regular strip map, Ⓖ , illustrates its relationship to the appropriate city or area map.



SPECIAL APPROACH MAP Similar in general format to the city and special area maps. The Approach unit, Ⓗ , is used in certain large metropolitan areas to show the through traveler the major direct routes through a congested area without the use of several detailed city units.

HOW TO COMPUTE YOUR MILEAGE

To compute overall mileage for your specific Triptik routing, combine the red cumulative mileage appearing in the margins of regular Strip Maps with the mileages shown in red on the City Maps.

The diagram shows how the red mileage between points Ⓐ and Ⓑ of Regular Strip Map No. 1 (224 miles), the red mileage between points Ⓑ and Ⓒ of City Strip Map No. 2 (27 miles) and the red mileage between points Ⓒ and Ⓓ of Regular Strip Map No. 3 (133 miles) must be added together to give the mileage from Ⓐ to Ⓓ (384 miles) via routes followed on each of these three maps.

Trip Planning and Expenses

A TRIP well planned is a trip enjoyed. Because one of the greatest pleasures of motor travel is its freedom from confining schedules, stringent timetable planning is not suggested. Time is usually an important factor, however, and some preparation will pay dividends in enjoyment, efficient use of available hours, and sometimes in expense.

Experienced travelers allow 2½ hours for each 100 miles. This provides a reasonable allowance for driving time, meals, gasoline and rest stops. The simple formula outlined below will help in effective budgeting of vacation time.

Total days of vacation		Estimated number of travel hours per day		Total hours available	
_____	×	_____	=	_____	A

Approx. total mileage for trip		Hours allowable for driving, rest and lunch stops	
_____	× 2.5 ÷ 100 =	_____	B

A		B		Hours available for sightseeing	
_____	−	_____	=	_____	C

List the objectives you expect to visit and apportion the time shown in C among them.

Objectives	Hours

EXPENSES

FOR MOST PEOPLE, expense is the most important item in planning a trip. Personal habits, the amount and frequency of roadside refreshments, the purchase of souvenirs, type of car, season of the year and the region covered—all have a significant effect on expenses. For example, the overnight accommodations figure given below represents an *overall average.* Higher average rates can be expected in metropolitan areas and in vacation areas that operate seasonally. Similarly, the estimated cost of gas and oil is based on a car which travels about 15 miles on each gallon of gas . . . plus an allowance for oil consumption.

It is easy to figure the miles per gallon for <u>your</u> car. Simply use the following formula:

Miles Driven Since Last Fill-up		Gallons of Gas Required This Fill-up		Miles Per Gallon
_____	÷	_____	=	_____

The following will help in determining the approximate cost of a proposed trip.

Overnight Accommodations

Number of Days		Average rate two persons in one room		
_____	X	$27.00	=	$_____
For one person subtract 20% of the above			–	$_____
For additional persons sharing one room add $3 per person per day			+	$_____
			Total overnight expense	$_____ **A**

Food, Tips and Admissions

Number of Days		Average daily food cost per person exluding tips		Number in party		Total food cost
_____	X	$13.00	X	_____	=	$_____ **B**

Daily costs of admissions, amusements, tips and miscellaneous purchases	$_____ **C**
Allow $5.00 for each 100 miles to cover gas and oil	$_____ **D**
Toll charges (ferries, highways, bridges)	$_____ **E**
	Estimated cost of trip
Total of A, B, C, D and E	$_____

Driving Tips

COURTESY and common sense are the bases of all good driving. Treat yourself and your automobile well and your vacation will be a pleasant and safe one.

Observe the posted speed limits. Pay strict attention to traffic signs and lights; they're there for a reason.

Don't pass on hills, curves, or in tight traffic. Pass only when you are sure that you have plenty of clear space ahead and that no one is trying to pass you at the same time.

If you feel fatigued, don't drive. At each gasoline stop, get out of the car and move around. Make an occasional refreshment stop. In case of real weariness, halt for a nap. To avoid fatigue and to insure getting your choice of accommodations, start early in the day and stop early in the afternoon.

Pay close attention to the road, but don't keep your eyes on it constantly. From time to time, check your car gauges and glance at the passing landscape momentarily to prevent frozen vision. Shift your driving position occasionally.

ECONOMICAL DRIVING depends on the condition of your car and how you operate it. The best guide to fuel-conscious auto maintenance is your owner's manual. Keeping the engine tuned, the hoses and wiring in good condition, the filters, points, plugs and emission control devices clean, all fluids clean and at the correct level, the wheels balanced and the tires properly inflated will coax more miles from each gallon of gasoline. And, when filling the gas tank, prevent spillage by not "topping it off."

Use a slow, easy drive to warm a cold engine. Accelerate smoothly, especially when entering a freeway or ascending a grade. Anticipate traffic signals to minimize stop-and-go driving. Where conditions permit, maintain moderate, steady speeds. Whenever possible, reduce the use of air-conditioners, heaters and other optional power equipment. Turn off the engine when parking for more than one minute.

Planning is a large part of fuel conservation. Let your AAA club help you plan an energy-efficient trip. Travel light; avoid using a car-top rack. Combine short trips, such as visits, errands and shopping.

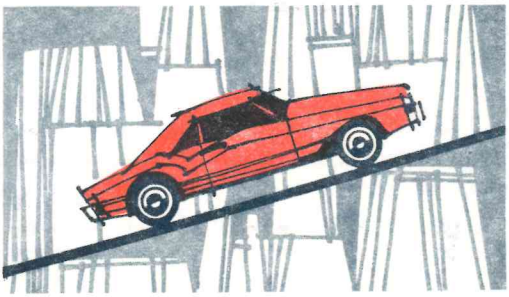
NEVER CARRY EXTRA GASOLINE, IN ANY CONTAINER. Combustion from fumes or accident is a lethal possibility.

FREEWAY DRIVING requires some adjustments in your driving habits. Because access is limited, it is important to plan exit points and service stops well in advance.

Upon entering a superhighway, use the acceleration lane to reach the approximate pace of traffic, then pick a clear space and merge into the main lanes. Once on the highway, maintain a speed consistent with traffic.

Keep a watchful eye on all other vehicles within view by glancing ahead and checking rearview mirrors. Use directional signals for lane changing and passing; always allow sufficient clearance before returning to your lane. Follow at a safe distance—at least one car length for every 10 miles of speed, more if conditions are less than optimum. Slow down gradually to force the too-close follower to pass you.

Check informational signs regularly. If you pass the exit you intended to take, continue to the next. **To slow down, stop or back up invites disaster.**



Should your car become disabled, pull completely off the roadway. Raise the hood and hang a white cloth from the driver's side of the car as a signal for help. Stay with your car and wait for the police or an emergency vehicle.

When you leave a superhighway, allow yourself time to readjust to normal driving. Remember that you will be back in the world of congestion, lower speed limits, traffic lights, and a shorter range of vision.

MOUNTAIN DRIVING, now that most major mountain roads are improved and comparatively easy to negotiate, can and should be very enjoyable. However, a few special tips are in order.

Remember that your car loses efficiency in high altitudes. Acceleration is slower and it takes longer to pass

another vehicle than you may be used to. Do **not** adjust your carburetor; you'll invite more trouble than you'll cure.

On long downgrades, do not ride your brakes. Use the compression of your motor—either second or low gear—to help slow the car. When climbing long hills, also be sure to shift into a lower gear; it will help forestall overheating, which leads to vapor lock. If a vapor lock does develop, place a damp cloth over the fuel pump for a few minutes.

Keep a full radiator. Expansion and lower boiling temperatures at high altitudes may cause loss of coolant. And, if you are hauling a trailer up long mountain grades, be considerate of those behind you by using the climbing lane if there is one or by pulling over when opportunity permits to let the faster traffic pass.

The single most common cause of accidents on mountain highways is straying onto the wrong side of the road. Stay on your side of the yellow line, especially on curves. Observe the speed limits carefully, again especially those on curves.

DESERT DRIVING is no longer subject to the hazards and discomforts once encountered. The major highways are excellent and well traveled; there are air-conditioned accommodations and well-spaced service facilities. The nature of the desert, however, calls for certain precautions. Maintain a reasonable speed and don't overwork your car in the heat. The combination of the dry climate, long stretches of roadway and high speed can cause highway hypnosis.

Keep your radio tuned to local stations for current weather information; temperatures may soar to as much as 30 to 40 degrees above the average. Temperatures of 100 degrees or over have been recorded in the spring and fall and as high as 123 in the summer months.

During the summer, plan to avoid the heat of the sun between 11 a.m. and 4 p.m. Never attempt to walk any distance in the desert.

Sandstorms and torrential rainstorms are unsuspected hazards in the desert. If you encounter such unexpected conditions, pull well off the highway and stop until it is over. However, do **not** halt in a cut or other low spot; you may find yourself in the path of a flash flood.

Check your tires in the morning, when they are cool. Carry your normal tire pressure. Although artificial heat pressure will always build up in tires during the day, the

buildup and risk of blowout are greater when tires are underinflated. If you think your tires are riding abnormally hard, stop to cool them. **Do not bleed them.**

Check the radiator and oil at each fuel stop. Unless you have a faulty radiator or hoses, it should not be necessary to add water if you drive at a sensible speed. Watch your temperature gauge, especially on long upgrades. It might be wise to carry a container of water for emergencies. Also check the water level in your battery, which will dry out more rapidly in desert conditions.

WINTER DRIVING requires a special know-how and a great deal of common sense. Well in advance of the season's first snow storm, treat your car to a winter checkup, paying special attention to the battery, defroster, windshield wipers, tires, and exhaust system.

Remember to avoid the "three O's of winter driving"—Overpowering, Oversteering, and Overbraking—any one of which is capable of producing a bad skid. If a wheel spins when trying to start out, release the accelerator and reapply pressure more gently and gradually. If the wheels persist in spinning, you may have to "rock" the car in order to get going. This is done by shifting the gears while lightly applying pressure to the gas pedal to produce a rhythmic back-and-forth motion. With a little patience and practice, rocking will usually put a car in motion even in deep snow. For the best results and greater safety, snow tires or chains should be used. Never let the air out of tires in an attempt to obtain better traction.

Once in motion, driving on ice or snow requires more than the usual attention. Be alert! Try to anticipate potentially hazardous situations. Be especially careful on hills, bridges and curves. Make certain that other drivers can see you by using your headlights on low beam even during the daytime. Signal your intentions to stop or turn much earlier than under normal conditions. Do not get into situations which might require sudden stops.

If you will be driving for some time over snowy roads, check periodically for an accumulation of ice under the fenders, a condition that can make steering difficult. Do not allow snow to clog the exhaust pipe. Always keep a window slightly open to keep you alert and dispel any danger from exhaust fumes.

Always check with the nearest AAA office for the latest weather and road conditions, then listen to your car radio for further word while driving.

Speed Limits and Accidents

THE BASIC SPEED LIMITS listed below are for typical highways. Lower limits are posted in cities, villages, school zones and on hazardous sections of roadway. Posted limits supersede the basic maximums when in conflict. Most Interstate highways or other expressways have a **minimum** speed limit, which should be obeyed as rigidly as the maximum. Unless otherwise indicated, speed limits are the same for small trailers with a gross weight of 2,000 pounds or less.

All 50 states have laws permitting motorists to turn right on red. Regulations that apply in individual states are designated by the following symbols preceding the state name:

● Right turn on red *unless otherwise posted.*

●Right turn on red *only where posted.*

Certain precautions *must* be observed before turning right on red: come to a full stop, yield to pedestrians and vehicles, turn with extreme caution.

In Case of Accident

Report immediately to your insurance company every accident in which your car is involved, even though the accident may seem trivial.

Stop.

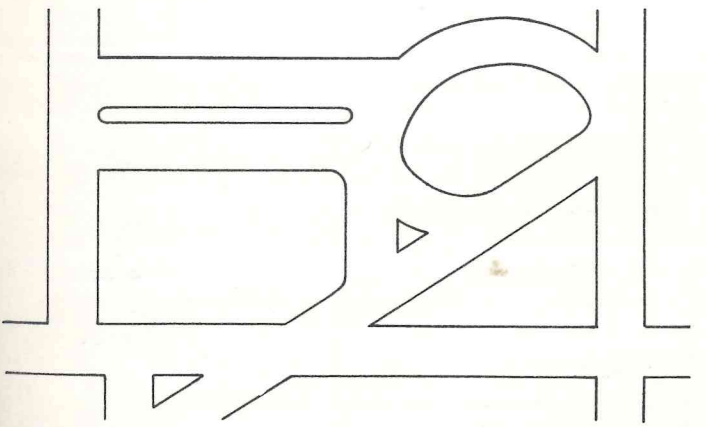
Determine the extent of personal injuries and give all possible aid. Do not attempt to move a seriously injured or unconscious person. Stop severe bleeding and keep victims warm.

Call the police as soon as possible—if someone is injured they will summon an ambulance and physician.

Keep calm. Don't argue. Don't discuss the accident or admit fault. Exchange credentials. Get names of all witnesses; give **only** to your own insurance company.

Jot down full details of accident—surroundings, position of vehicles, license numbers, speed, time, weather and road conditions. Step off distances. If you have a camera, take snapshots of the scene, of damage or tire marks and make notes for each shot.

Make diagram of accident on sketch shown below. Change sketch in any way to apply to conditions. Show positions of vehicles "before" and "after"; also indicate direction by arrows.



Important... Get the Following Information

Name, address and driver's license number of operator **and owner** of other car:

B. Registry of Motor Vehicles
C. Your Insurance Company

About Accommodations

AAA FIELD REPRESENTATIVES travel throughout North America carefully and systematically searching for accommodations, restaurants and campgrounds to satisfy the varied needs of our more than 18 million members. These highly trained people regularly check establishments to ensure that they meet AAA's requirements for recommendation.

Once an establishment receives AAA endorsement, it becomes eligible for our Official Appointment or Campground Appointment service. This permits the establishment to display the famous AAA emblem and to use it in advertising. Most approved establishments want this recognition, for which a modest annual fee is charged. In return, the operation must guarantee its rates and services to AAA members. These establishments are designated by an AAA and are listed in boldface type in the TourBook or Camping directory.

The American Automobile Association guarantees that rates at hotels, motels, resorts and campgrounds displaying the AAA emblem will be no higher than the maximum listed in the current AAA publications. Should you be charged a rate higher than the maximum listed, submit your receipt to AAA. A refund is made when our investigation indicates unjustified overcharging. (The rate guarantee does not apply during major special events.)

Many establishments maintain the same rates all year. However, those in resort areas usually have higher rates during the main season and lower rates in the off season. AAA publications show either rates in effect all year or the in-season rates with their effective dates. Off-season rates are shown with effective dates if significantly reduced. All rates are for typical guestrooms; extra person rates cover standard room equipment. Family plan is indicated by the letter **F** following the extra person rates.

Special deposit and length-of-stay requirements may be imposed during special events or at holiday periods. Obviously, these practices are beyond the control of AAA. In such situations, you should have a definite understanding as to the required length of stay and the rate to be paid.

Ratings, indicated by one to five diamonds, assist you in selecting the type of accommodation that best suits your needs and preferences. A single ◆ indicates that the establishment meets all AAA requirements; additional diamonds reflect the degree to which a place exceeds the basic standards.

MAKING RESERVATIONS

It is always wise to make reservations. This is particularly true in resort areas, at places where special events are being held, or during peak travel seasons in any region. Your AAA club or any affiliated club along your route can help with the necessary arrangements.

If you prefer to make your own reservations, remember that hotels and motels do not ordinarily demand a deposit with reservations, but a reservation is more likely to be held if a deposit accompanies the request. Resorts invariably require a payment. As a general rule, a reservation without deposit will be released to other guests if it is not claimed by 6 p.m., unless the establishment agrees to a later arrival time.

In requesting reservations, the following details should be given:

(1) Number of persons in party
(2) Ages of children
(3) Type of accommodations desired
(4) Date and estimated hour of arrival
(5) Length of stay
(6) Rate desired

REMEMBER: Your request does not guarantee the type of room desired, at the rate specified, unless the reservation has been confirmed.

If you find that you are unable to keep your reservation, telephone or wire the hotel or motel so the space can be released to another party. Usually, there is no difficulty in obtaining refunds for deposits on reservations made at conventional hotels or overnight motels if cancellation is given 48 hours before your scheduled arrival.

Where a deposit is involved, you should have a definite understanding as to the length of time required for cancellation notice and refund of your deposit. Most resorts have specific refund notice policies varying from as little as 24 hours to 30 or more days. The guest who fails to cancel by the prescribed time has little recourse if a refund of his deposit is refused.

For Your Protection

Patronize AAA Establishments

RESERVATION REQUESTS

It will expedite making your reservations if you provide the establishment or the AAA counselor making the reservation for you with all the necessary information. To have the data at hand, fill out the following forms before placing your reservation.

AAA Bail Bond

SHOULD you be arrested for violating a traffic law, you will very likely be taken directly to court where you will face the decision of how to plead—guilty or not guilty.

A PLEA OF GUILTY will result in a fine which must be paid on the spot, before you are permitted to leave. If you are unable to pay the fine, you will be jailed for a specific period. AAA bonds do not apply in the case of a guilty plea.

IF YOU PLEAD NOT GUILTY, the court will set a hearing date and ask you to post an appearance bond (a sum of money which guarantees your appearance on that date). This is when your AAA membership can help you.

On the back of your membership card is an AAA Guaranteed Arrest Bond Certificate. Many courts will accept your card as an appearance bond for sums up to $200. If the card is not acceptable or the required bond exceeds $200, you should immediately contact the nearest AAA Club Office, which will make arrangements to post bond up to $5,000 in a form acceptable to the court.

HOWEVER, the following limitations on your AAA Bail Bond Service should be carefully noted:

- *Bail service does not cover charges involving use of alcohol, drugs or narcotics.
- *The bond is for the member only. It is not transferable.
- *The bonds cover only those criminal and misdemeanor charges relating to the use or operation of a motor vehicle.

After bond has been posted, if you are unable to attend the hearing, the bond will be forfeited, or the amount of the fine plus court costs will be deducted from it. Your Club or the National Surety Corporation will be notified and you will be expected to reimburse the Club. Your membership card will then be returned to you.

It is important to remember that AAA Bail Bond Service does not pay your fines or forfeitures for you. It is a type of loan, to spare you the inconvenience of detention until the hearing date. You are legally obligated to repay your AAA Club or the National Surety Corporation the amount of the fine or forfeiture deducted by the court (though you will pay no additional charge for the bond as you would with a regular bondsman. The charge for the Bail Bond service is included in your annual dues).

Some additional pointers:

(1) Respect the arresting officer, even if you think he is wrong.
(2) Police have the right to photograph, fingerprint and search you.
(3) You are entitled to contact an attorney.
(4) You are entitled to bail as soon as practicable.
(5) Personal checks are usually not acceptable for the payment of a fine.
(6) You should contact your own AAA Club soon after you use your AAA Bail Bond Service, to make the Club aware of your use of the bond.

Posted Speed Limits

Law enforcement agencies in many states are taking intensive measures to reduce the number of traffic accidents. This often means severe penalties and fines for traffic law violators. To help insure a safe and uninterrupted trip, AAA urges you to observe all traffic laws, including posted speed limits and other traffic control devices.

To The Court:

AAA Guarantees a bond forfeited by members presenting valid membership cards, except in cases involving the use of alcohol, drugs or narcotics. After a forfeiture, contact the nearest AAA Club. Return the card to the Club upon reimbursement. If inconvenient to obtain reimbursement from the nearest AAA Club, contact the AAA Club named on the membership card.

For Recommended Lodging, Dining Facilities and Points of Interest See: **AAA CA/NV TourBook**

APPROACHING

From the North and South

I-5 is the major north-south route, bisecting Los Angeles proper as well as the entire metropolitan area. From the north it traverses the San Joaquin Valley, then enters the city as the Golden State Freeway; from the south at San Diego it runs along or near the coast to Capistrano Beach, where it turns inland and follows the Santa Ana Freeway into Los Angeles. I-405 (San Diego Freeway) connects with I-5 at San Fernando and south of Irvine, providing an alternate route which avoids downtown Los Angeles.

Other controlled-access routes from the north are SR 99 and US 101; SR 99 terminates in I-5 a few miles south of Bakersfield, while US 101 approaches the metropolitan area as the Ventura Freeway then becomes the Hollywood Freeway near Los Angeles proper. The most scenic north-south route is slower SR 1. Traversing the rugged coast and offering outstanding views, it is sometimes subject to the dangers of fog and slides.

I-15, a north-south freeway between Las Vegas and San Diego, passes east of Los Angeles but provides freeway connections to the area via I-10 and SR 60 and 91.

From the East

Direct access from the east is via I-10, which enters Los Angeles over the San Bernardino Freeway and terminates at Santa Monica. Indirect access from points east is provided by I-40, a fast route across the desert terminating at I-15 in Barstow.

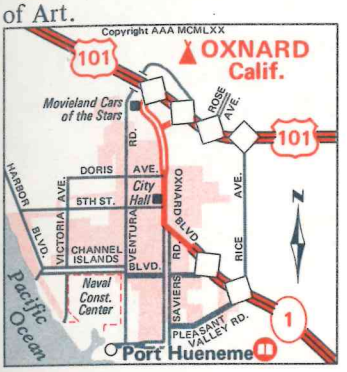
SANTA MARIA (pop. 32,749). The Santa Maria Historical Museum includes artifacts from the Chumash Indian, Spanish rancho and American pioneer eras.

LOMPOC (pop. 25,284). La Purisima Mission State Historic Park, 4 miles northeast, contains one of the most complete mission restorations. It is unusual in that it lacks the arches that characterized most Franciscan buildings.

SANTA BARBARA (pop. 70,215). A magnificent example of the Spanish-Moorish style is the County Courthouse, which features murals, interior decorations and sunken gardens. Mission Santa Barbara, called "Queen of the Missions," is one of the best preserved of the missions. Greek and Roman antiques, as well as oriental, American and European art are exhibited at the Museum of Art.



VENTURA (pop. 55,797). Mission San Buenaventura, Main and Figueroa Streets, was founded in 1782 and completed in 1809. The present church is restored.

PACIFIC GROVE (pop. 13,505). Butterfly Trees, on Lighthouse Avenue, are trees which, from late October to March, are covered with Monarch butterflies, an orange and black species that ranges from Canada to South America.

MONTEREY (pop. 26,302). The Old Customs House, in Monterey State Historic Park, is the oldest government building in California. It has flown the flags of Spain, Mexico and the United States.

Seventeen-Mile Drive is an interesting, scenic drive from Pacific Grove to Carmel. Points of interest along the way include Seal Rock and Cypress Point.

CARMEL (pop. 4,525). Mission San Carlos Borromeo del Rio Carmelo, called Carmel Mission, occupies an elevation near the sea, just south of Carmel on Lasuen Dr. At Point Lobos State Reserve, a rugged seacoast area 4 miles south, are a grove of Monterey cypress, beautiful flowers and sea lions.

SAN SIMEON Hearst-San Simeon State Historical Monument, off SR 1, contains the castle, guesthouses and 123 acres of the famed estate of William Randolph Hearst. The grounds and dwellings are atop La Cuesta Encantada (The Enchanted Hill), a 1,600-foot mountain overlooking San Simeon and the Pacific.

SAN MIGUEL Mission San Miguel Arcangel is at the south edge of town. Founded in 1797, the church is in good repair with many of its original decorations intact.

SAN LUIS OBISPO (pop. 28,036). Often called "The Prince of Missions," Mission San Luis Obispo de Tolosa was named for a 13th-century French saint. It still serves as a parish church.

SANTA MARIA (pop. 32,749). The Santa Maria Historical Museum includes artifacts from the Chumash Indian, Spanish rancho and American pioneer eras.

SAN FRANCISCO, CALIFORNIA

(pop. 715,674)

One of the most cosmopolitan cities in the United States, San Francisco is the financial center of the West and an important industrial city. Its port handles 3 million tons of cargo annually.

The city, varying in altitude from sea level to 927 feet, rests on a series of hills at the end of a narrow peninsula bounded on one side by the Pacific Ocean and on the other by San Francisco Bay, one of the largest land-locked harbors in the world.

Throughout the year San Francisco's calendar is filled with countless cultural, social and sports events. Places to visit are numerous. Chinatown offers shops, tearooms, temples, Christian missions, Chinese schools, theaters and grocery stores. Golden Gate Park is 3½ miles in length and covers an area of 1,017 acres. It has many miles of motor roads, bridle paths and foot trails; within the park are the California Academy of Sciences, Japanese Tea Garden and the M. H. de Young Memorial Museum. Mission San Francisco de Asis is one of the oldest buildings in the city. It differs architecturally from the other missions in its combination of Moorish, Mission and Corinthian styles.

Up and down a few of the steep streets clank the cable cars. Preserved as a national historic landmark, these still constitute a

FORT BRAGG (pop. 4,455). The California Western Railroad (The Skunk) makes trips from Fort Bragg at an elevation of 80 feet, to Willits, 1,365 feet.

LITTLE RIVER Pygmy Forest is thought to be the result of highly acidic soil. Some of the rare pygmy pine and pygmy cypress reach a mature height of only 2 feet.

ASTI Winery tours are offered by Italian Swiss Colony, off U.S. 101. The tasting room is open before and after tours.

SANTA ROSA (pop. 50,006). Luther Burbank Memorial Gardens honors the famed horticulturist who lived and worked here for 50 years.

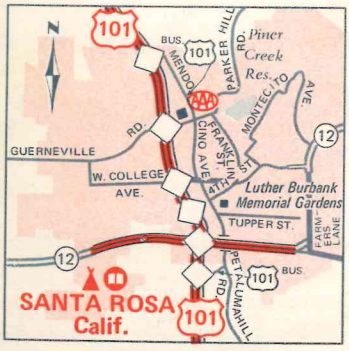
PETALUMA (pop. 24,870) Petaluma Adobe State Historic Park contains what is said to be the largest adobe structure in northern California.

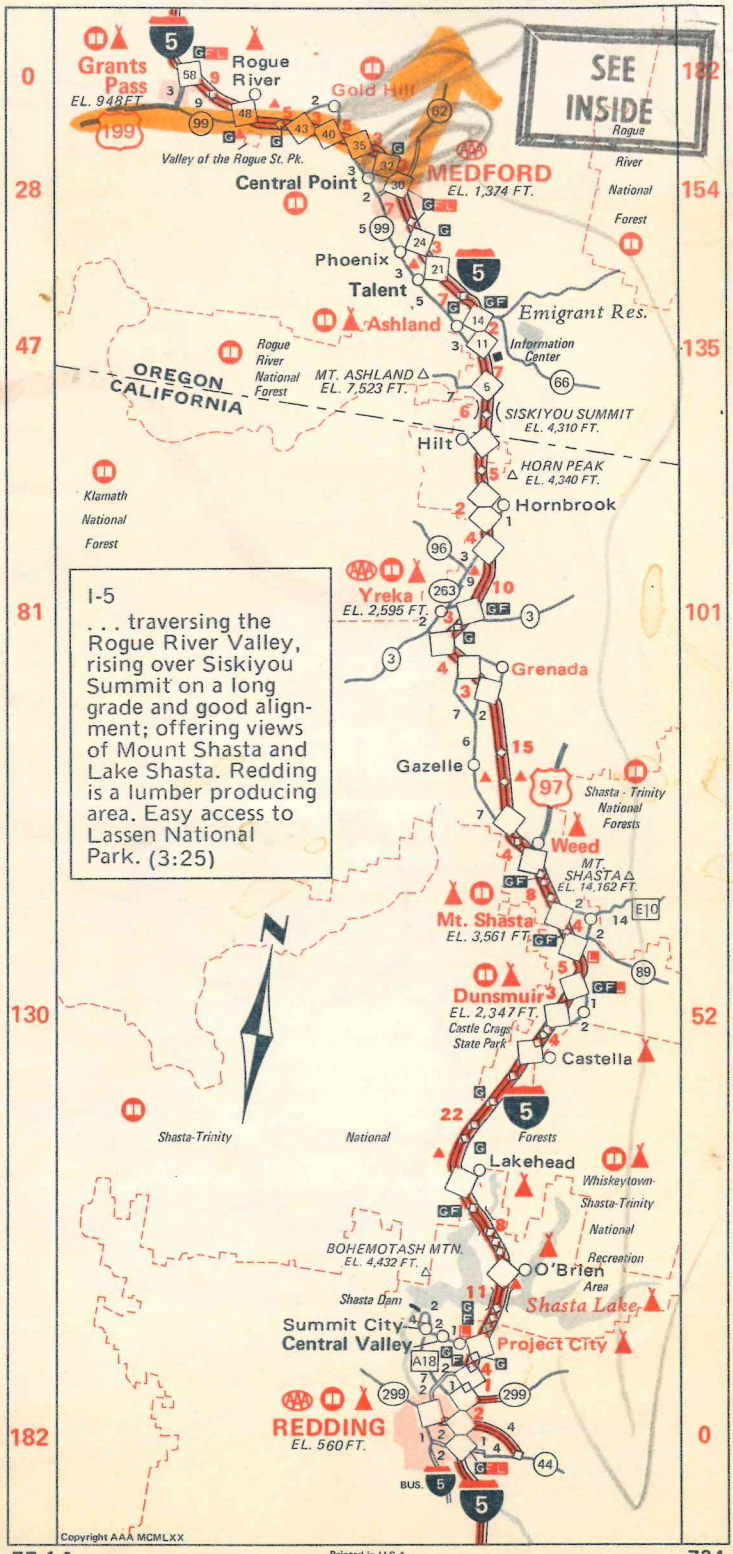
SONOMA (pop. 4,112). Sonoma State Historic Park preserves the Mission San Francisco Solano, the Sonoma Barracks and the Vallejo Home. The mission, northernmost of the chain of missions, contains the noted Jorgensen collection of Missions of California paintings.

POINT REYES NATIONAL SEASHORE Blunt headlands jut into the sea and grass-tufted dunes lie along secluded beaches on Point Reyes. Inland are rolling hills, freshwater lakes and forested Inverness Ridge, where the Douglas-fir, typical of the northern California coast ranges, and the Bishop pine of the southern forest areas merge.

SAN RAFAEL (pop. 38,977). The Marin County Civic Center, just north off U.S. 101, was the last project of Frank Lloyd Wright.

MUIR WOODS NATIONAL MONUMENT Here is one of the most beautiful and accessible of the famous redwood groves. A few of the coast redwoods within the monument have grown to the awe-some height of 340 feet with a diameter of 13 feet.





I-5
. . . traversing the Rogue River Valley, rising over Siskiyou Summit on a long grade and good alignment; offering views of Mount Shasta and Lake Shasta. Redding is a lumber producing area. Easy access to Lassen National Park. (3:25)

GRANTS PASS (pop. 12,455). Gladiolus fields here reach full brilliance near mid-summer. Rogue River trips, with guides or by jet boat excursion, are popular.

CRATER LAKE NATIONAL PARK On the crest of the Cascade Range, Crater Lake National Park is famous for its natural beauty. The most remarkable feature is the lake itself, contained in the former caldera of an ancient volcano. Rim Drive encircles the caldera and provides fine views. At Sinnott Memorail Overlook, exhibits explain the story of the lake.

ASHLAND (pop. 12,342). Ashland is noted for its mineral springs, most of which are municipally owned. Varied recreational facilities are available in nearby Rogue River National Forest.

REDDING (pop. 16,659). At the northern end of the fertile Sacramento Valley, Redding provides unbounded recreational opportunities. Shasta Dam, 6 miles west of I-5 from a point 8 miles north of Redding, offers a film and a model of the dam with accompanying narration. Shasta State Historic Park, 6 miles west of Redding, was once a robust gold mining town.

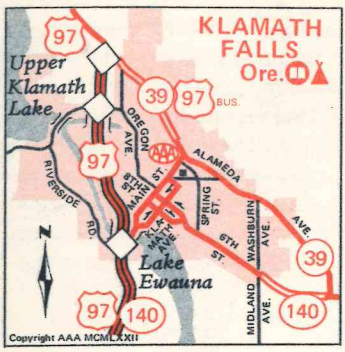
BEND (pop. 13,710). Cascade Lakes Highway is a 76-mile scenic drive through a portion of Deschutes National Forest.

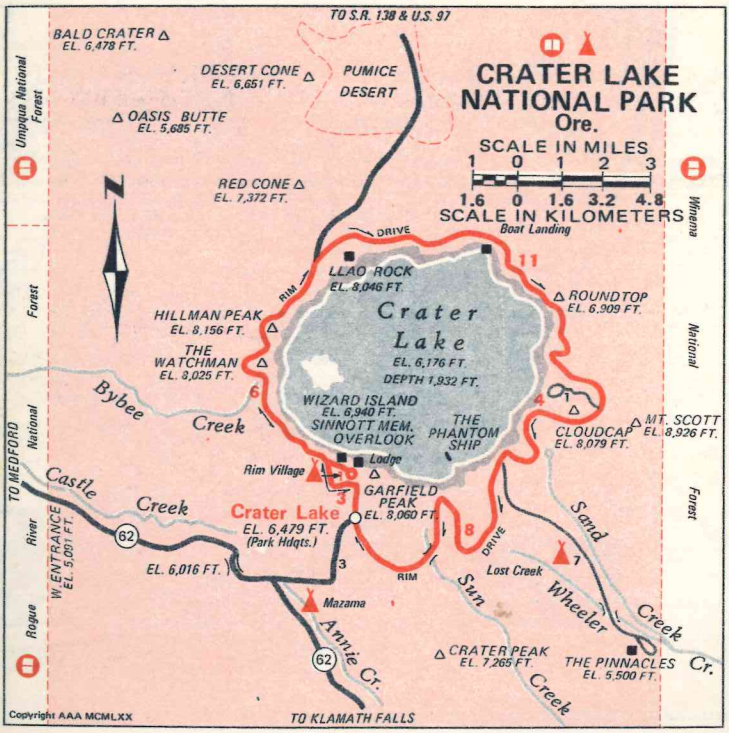
CRATER LAKE NATIONAL PARK. On the crest of the Cascade Range, Crater Lake National Park is famous for its natural beauty. The most remarkable feature is the lake itself, contained in the former caldera of an ancient volcano. Rim Drive encircles the caldera and provides fine views. At sinnott Memorial Overlook, exhibits explain the story of the lake.

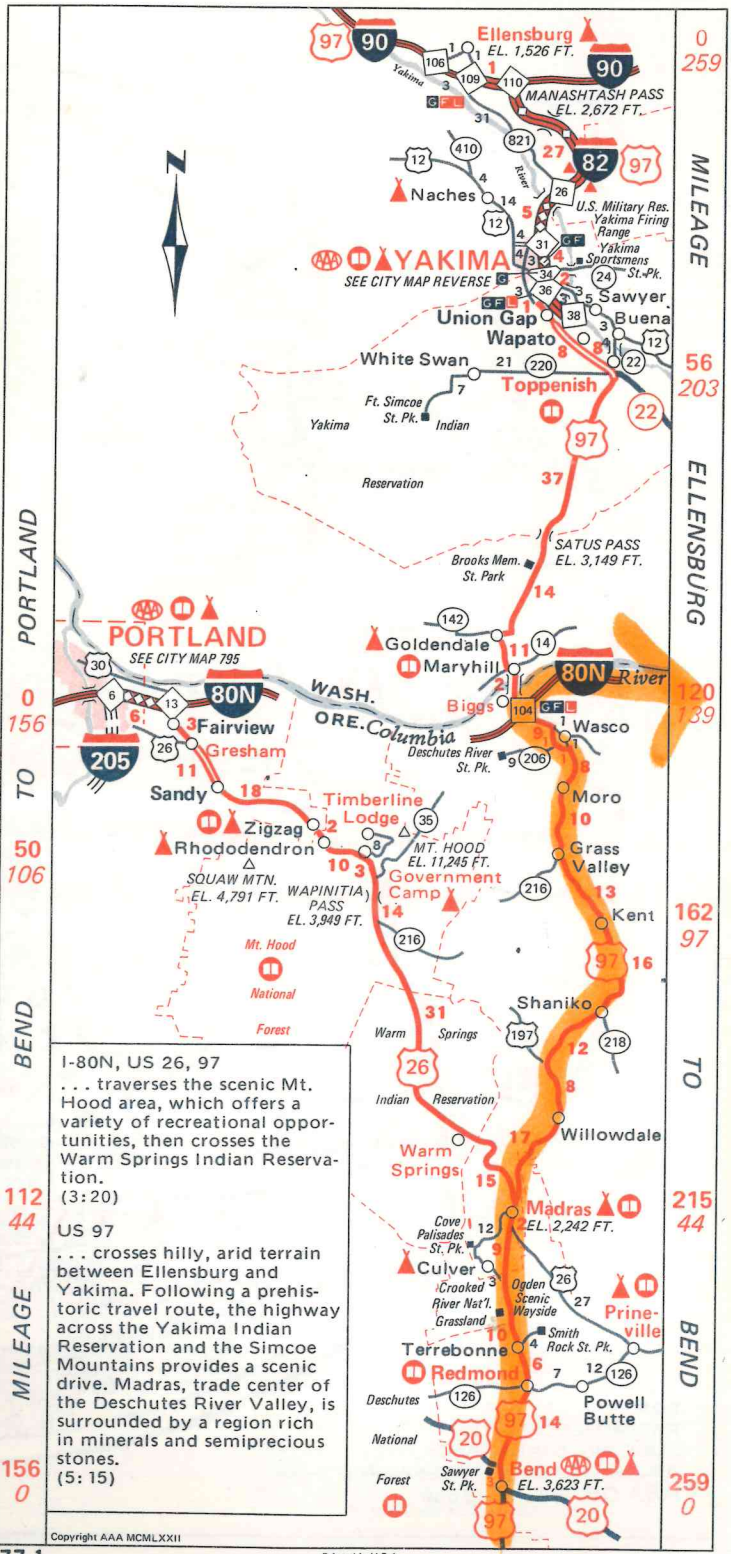
KLAMATH FALLS (pop. 15,775). A local phenomenon is a stratum of hot water underlying sections of the city. It is piped through radiators and grids to heat homes and offices as well as melt snow from sidewalks and steps.

LAVA BEDS NATIONAL MONUMENT Centuries ago, volcanoes in the area issued masses of molten lava which, after cooling, formed this curious region of rugged terrain. Among the features are cinder cones, deep chasms, collapsed tunnels and caves. Some of the caves contain rivers of ice; others have Indian pictographs.



77-1





I-80N, US 26, 97
. . . traverses the scenic Mt. Hood area, which offers a variety of recreational opportunities, then crosses the Warm Springs Indian Reservation.
(3:20)

US 97
. . . crosses hilly, arid terrain between Ellensburg and Yakima. Following a prehistoric travel route, the highway across the Yakima Indian Reservation and the Simcoe Mountains provides a scenic drive. Madras, trade center of the Deschutes River Valley, is surrounded by a region rich in minerals and semiprecious stones.

YAKIMA (pop. 45,588). The fertile, irrigated Yakima Valley, often called the "Fruit Bowl of the Nation," surrounds Yakima (YACK-i-mah). The Yakima Trolley Lines, using 1906 equipment, offer varied tours; check locally for schedule.

TOPPENISH (pop. 5,744). Fort Simcoe State Park, 25 miles west, was one of the two interior Washington Territory Army posts established as a result of Indian hostilities. Several of the original buildings have been restored.

MARYHILL Maryhill Museum of Fine Arts, 6 miles west on SR 14, exhibits European and American art, early Indian artifacts, French mannequins, firearms and personal possessions of Qeeen Marie of Romania.

MOUNT HOOD AND MOUNT HOOD NATIONAL FOREST Perpetually snow-capped Mount Hood rises 11,245 feet above sea level, the highest elevation in Oregon. Many living glaciers extend to near timberline on all sides. The prime feature of Mount Hood National Forest, it is encircled by the scenic Mount Hood Loop Highway. The loop road passes through historic Bennet Pass, used by pioneers traveling the Old Oregon Trail from The Dalles to Willamette Valley.

REDMOND (pop. 3,721). Petersen's Rock Gardens, 7 miles southwest off U.S. 97, cover several acres with bridges, terraces and replicas of historic structures built of rock and petrified wood.

BEND (pop. 13,710). Cascade Lakes Highway is a 76-mile scenic drive leading southwest from Bend past Bachelor Butte, west and south to Elk Lake and Crane Prairie Reservoir, then east to Pringle Falls and Us 97. The Lava Butte Geological Area and Lava Cast Forests are south of Bend off US 97.

CHENEY (pop. 6,358). Turnbull National Wildlife Refuge, with headquarters south of Cheney, is an important breeding place on the Pacific Flyway and attracts numerous imgratory waterfowl, shore birds and upland game birds; there is also a captive flock of rare trumpeter swams.

COLFAX (pop. 2,664). Steptoe Butte State Park, 151 acres, is 14 miles north of Colfax. Magnificent views are possible from the butte, a national historic landmark which is over 3,610 feet high.

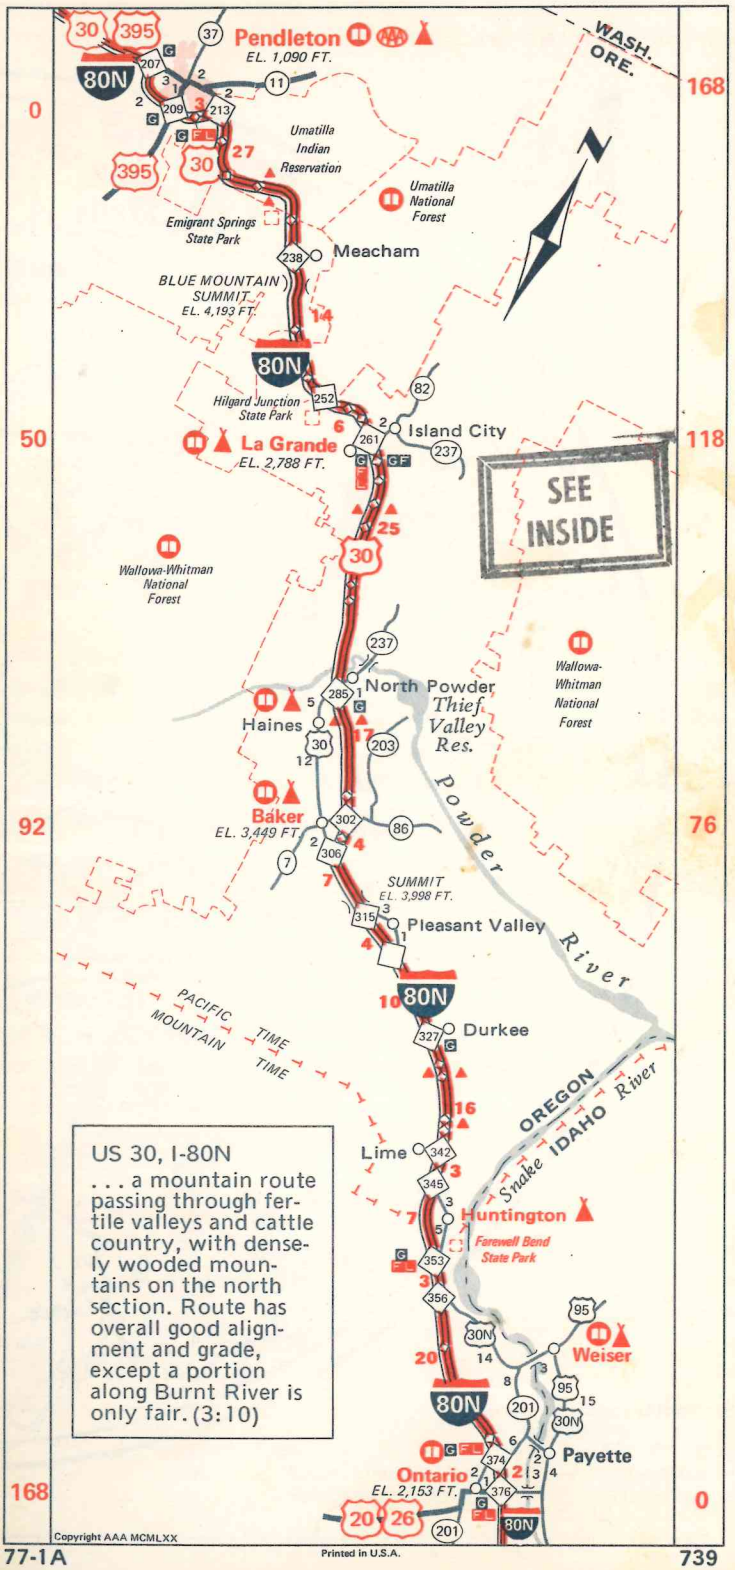
UMATILLA NATIONAL FOREST Umatilla National Forest has 1,390,283 acres in three divisions extending into southeastern corner of Washington. A trip along the summit of the Blue Mountains on the Kendall-Skyline Forest Road offers unusual panoramas. Dude ranches and numerous camp and picnic grounds provide opportunities for sports and recreational pursuits.

WALLA WALLA (pop. 23,619). Named for an Indian word meaning "many waters", Walla Walla lies in an extremely rich agricultural area with wheat its most important commodity. "Trails West" Outdoor Drams, presented in the summer, portrays the history of the region from 1804-1855.

WHITMAN MISSION NATIONAL HISTORIC SITE The 98-acre site of the Indian Mission, established in 1836 by Dr. Marcus Whitman and his wife, is 7 miles west of Walla Walla off U.S. 12. Called Waiilatpu (place of rye grass), this was one of the first institutions of its kind in the Northwest. It operated until 1847, when a misunderstanding with the Cayuse Indians led to the massacre of the Whitmans and 11 other persons. The area has been excavated and the sites of the early buildings, burned after the massacre, have been outlined.

PASCO (pop. 13,920). Ice Harbor Dam, 9 miles east, is one of four dams on the lower Snake River that extend river barge navigation to Lewiston, Idaho. Self-guided tours of the dam and powerhouse are available.

PENDLETON (pop. 13,197). One of the West's most famous rodeos in the mid-September Pendleton Round-Up throughout the Pacific Northwest occupy a teepee village set up at the Round-Up grounds for this celebration.



US 30, I-80N
. . . a mountain route passing through fertile valleys and cattle country, with densely wooded mountains on the north section. Route has overall good alignment and grade, except a portion along Burnt River is only fair. (3:10)

PENDLETON (pop. 13,197). One of the West's most famous rodeos is the mid-September Pendleton Round-Up. Opening with the Westward Ho parade, in which as many as 4,500 take part, the 4-day event includes the colorful Happy Canyon Indian pageant. Tribes from throughout the Pacific Northwest occupy a teepee village set up at the Round-Up grounds for this celebration.

UMATILLA NATIONAL FOREST Umatilla National Forest has 1,390,283 acres in three divisions extending into the southeastern corner of Washington. A trip along the summit of the Blue Mountains on the Kendall-Skyline Forest Road offers unusual panoramas. Dude ranches and numerous camp and picnic grounds provide opportunities for sports and recreational pursuits.

LA GRANDE (pop. 9,645). Mount Emily Scenic Route winds 10 miles to the top of Mount Emily, 3,000 feet above the Grande Ronde Valley.

WALLOWA-WHITMAN NATIONAL FOREST Varied scenery characterizes the Wallowa-Whitmas National Forest, which encompasses 2,246,771 acres. The forest offers opportunities for skiing, fishing, hunting, camping and picnicking. Horses may be rented at many resorts and ranches.

HAINES (pop. 212). Oregon's largest natural warm water pool is 2 miles north on old US 30. The Eastern Oregon Museum, 4 blocks off US 30 in town, features a reconstructed blacksmith shop, saloon bar and pioneer relics.

BAKER (pop. 9,354). Baker became the freighting and stagecoach center for the boomtowns that sprang up following the discovery of gold in the nearby hills. Cornucopia is noteworthy among the several ghost towns within a few hours' drive.

WEISER (pop. 4,108). Named after Sgt. Peter Weiser (WEE-zer) of the Lewis and Clark Expedition, Weiser is on the Snake River at the mouth of the Weiser River. Lookout points offering scenic views over Hells Canyon are accessible in summer via US 95 or SR 71.

ONTARIO (pop. 6,523). Semiprecious stones may be found throughout Malheur County. A map indicating locations and type of stones may be obtained at the Ontario Chamber of Commerce.

CORBETT At Crown Point State Park, about 5 miles east on US 30, a panorama of the Columbia River Gorge may be seen from Vista House.

BONNEVILLE Bonneville Lock and Dam is in two sections separated by Bradford Island and creates a deep lake extending upstream for 50 miles to The Dalles. Of particular interest are the fish ladders and fish locks built to facilitate the passage of spawning fish upstream. Most species migrate at various times from March to November.

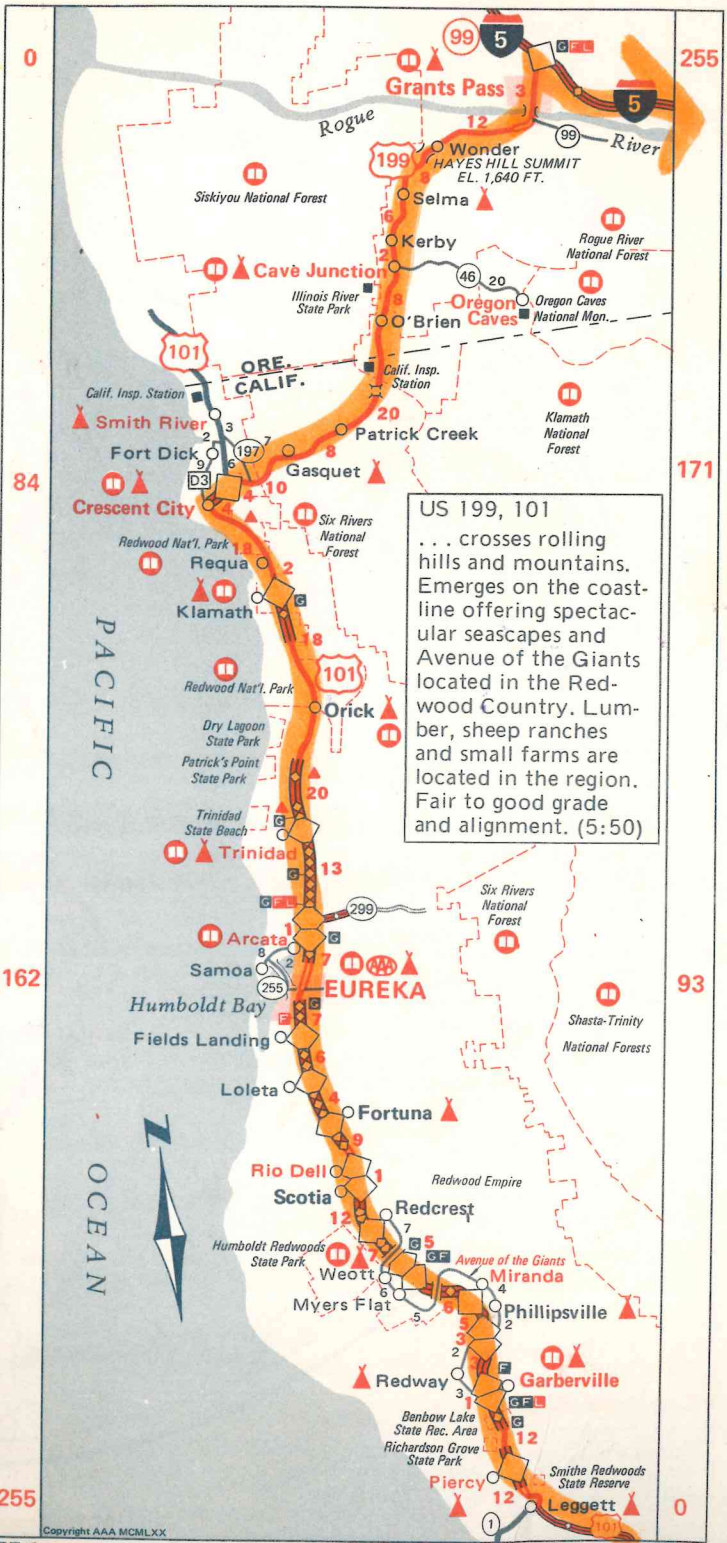
GIFFORD PINCHOT NATIONAL FOREST Straddling the Cascade Range from Central Washington to the Columbia River, Gifford Pinchot National Forest covers 1,251,051 acres of rugged, densely wooded mountains. On opposite edges of the forest, glacier-clad Mount Adams (12,326 ft.) and Mount St. Helens (9,677 ft.) tower above the lesser peaks.

MOUNT HOOD AND MOUNT HOOD NATIONAL FOREST Perpetually snow-capped Mount Hood rises 11,245 feet above sea level, the highest elevation in Oregon. Many living glaciers extend to near timberline on all sides. The prime feature of Mount Hood National Forest, it is encircled by the scenic Mount Hood Loop Highway. The loop road passes through historic Bennet Pass, used by pioneers traveling the Old Oregon Trail from The Dalles to Willamette Valley.

THE DALLES (pop. 9,860). The city's name is derived from the French words meaning "flagstones." Early voyageurs applied the term to the basalt-lined channels through which the waters of the Columbia formerly flowed. These have been submerged by the backwater of The Dalles Damm.

MARYHILL Maryhill Museum of Fine Arts, 6 miles west on SR 14, exhibits European and American art, early Indian artifacts, French mannequins, firearms and personal possessions of Queen Marie of Romania.

PENDLETON (pop. 13,197). One of the West's most famous rodeos is the mid-September Pendleton Round-Up. Opening with the Westward Ho parade, in which as many as 4,500 take part, the 4-day event includes the colorful Happy Canyon Indian pageant. Tribes from throughout the Pacific Northwest occupy a teepee village set up at the Round-Up grounds for this celebration.



US 199, 101

. . . crosses rolling hills and mountains. Emerges on the coastline offering spectacular seascapes and Avenue of the Giants located in the Redwood Country. Lumber, sheep ranches and small farms are located in the region. Fair to good grade and alignment. (5:50)

GRANTS PASS (pop. 12,554). Gladiolus fields here reach full brilliance near mid-summer. Rogue River trips, with guides or by jet boat excursion, are popular.

SISKIYOU NATIONAL FOREST The forest embraces over one million acres on Oregon's rugged southern coast. This is the principal range of the rare Port Orford cedar and Brewer or weeping spruce. The kalmiopsis, a small rhododendron-like plant known to botanists as possibly the world's rarest shrub, also grows here.

OREGON CAVES NATIONAL MONUMENT In the Siskiyou Mountains, Oregon Caves National Monument is reached by a road which winds through the densely forested countryside.

Here, in the heart of Mount Elijah in a bed of marble, nature has carved and decorated the Marble Halls of Oregon. Pillars, stalactites and canopies of limestone line passageways and hang from vaulted domes above the many galleries of this famous cavern.

CRESCENT CITY (pop. 2,586). The Old Lighthouse, accessible only at low tide, houses a museum containing the original light, antique clocks, old log books and photographs of shipwrecks.

REDWOOD NATIONAL PARK Encompassing 58,000 acres, Redwood National Park lies along the northern coast of California. In addition to the trees that first evolved over 30 million years ago, the park contains many salt marshes, beaches, dunes, cliffs and streams.

EUREKA (pop. 24,337). A busy lumbering, industrial and commercial city, Eureka is on Humboldt Bay. Exhibits on the logging methods of the past are housed in Fort Humboldt.

WEOTT Humboldt Redwoods State Park is famed for the 365-foot Rockefeller Tree, the 352-foot Rockefeller Tree, the 352-foot Founders' Tree and over 40 memorial redwood groves. Avenue of the Giants winds through dense redwood groves.

GARBERVILLE The Squirrel, an open-end sightseeing bus, makes tours of the redwood country and includes the Avenue of the giants.

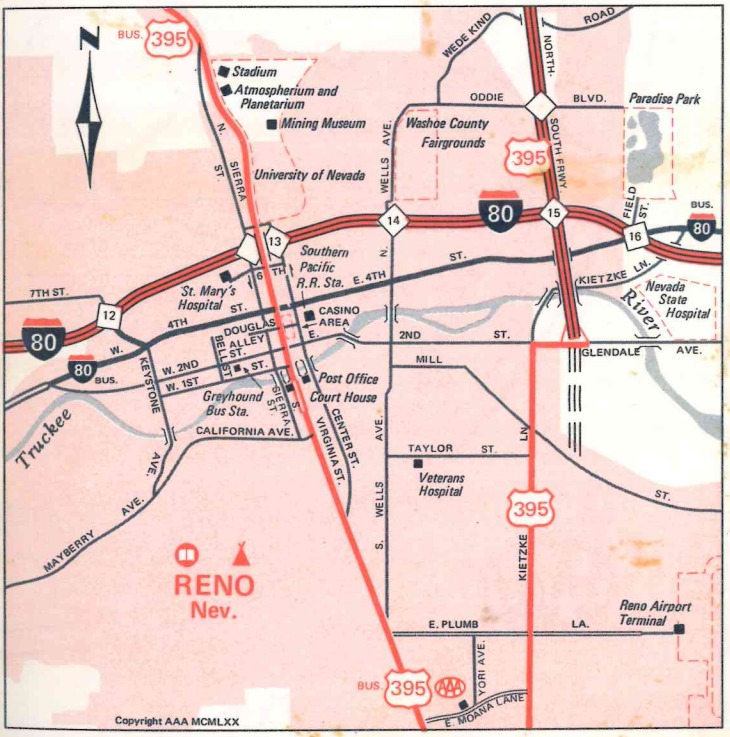
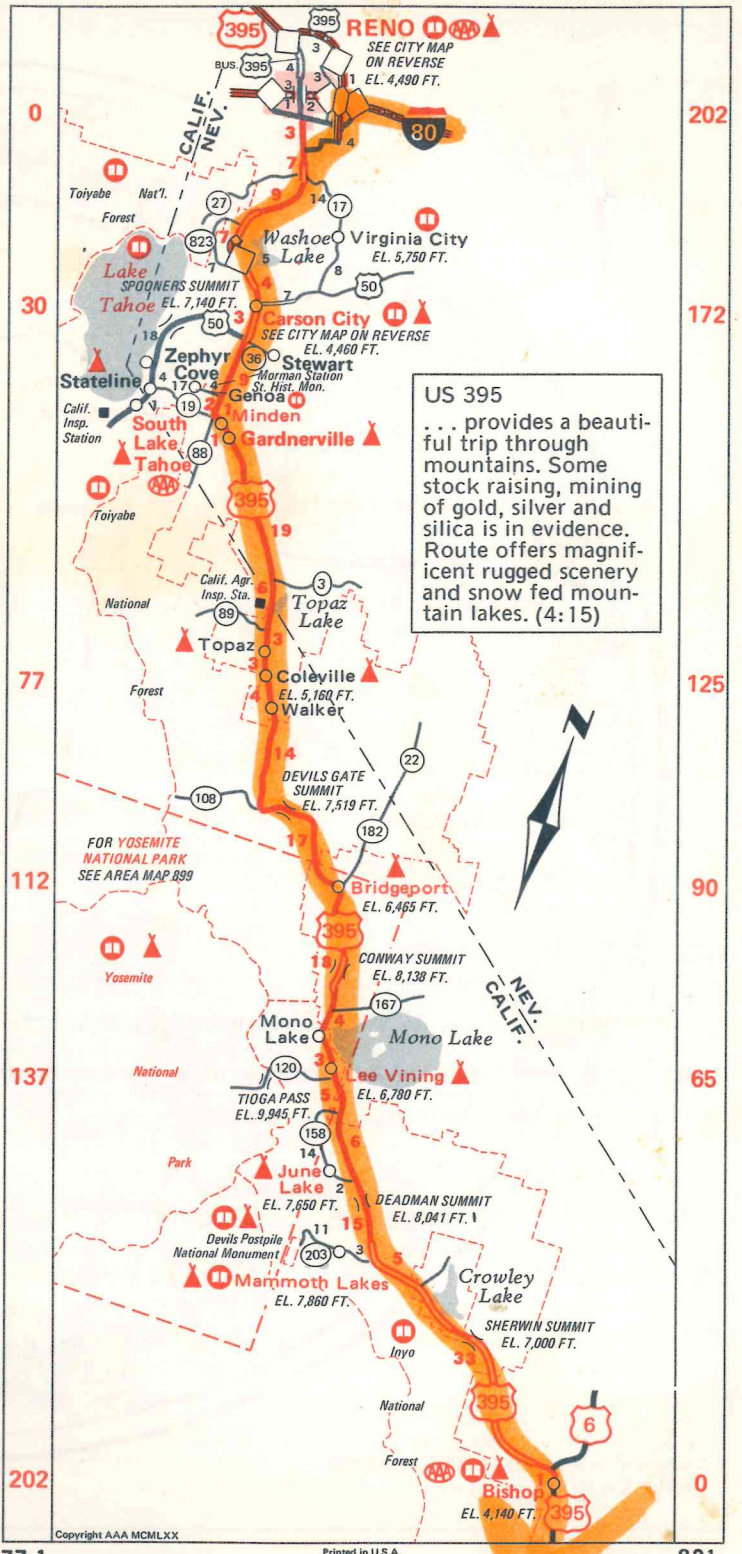
ELKO (pop. 17,621). In the Northeastern Nevada Museum are Shoshone Indian crafts and artifacts, mining implements and a collection of minerals, ore and petrified wood.

SPARKS (pop. 24,187). Harrah's Automobile Collection exhibits hundreds of antique, vintage and classic automobiles, many restored to their original condition. Also here are an old steam engine and railroad cars, several antique boats and motorcycles.

RENO (pop. 72,863). Calling itself "the biggest little city in the world," Reno also might be termed part of the country's last frontier. Liberal state laws permit the divisions of an open town, with its varied state shows and gaming activities operating on a 24-hour basis.

On the University of Nevada campus is the Atmospherium and Planetarium where programs describe weather phenomena and the night skies, and changing shows depict astronomical events. At the Mining Museum are mining, metallurgical, geological and mineralogical collections. Exhibits illustrate the mining history in this area.





US 395

. . . provides a beautiful trip through mountains. Some stock raising, mining of gold, silver and silica is in evidence. Route offers magnificent rugged scenery and snow fed mountain lakes. (4:15)

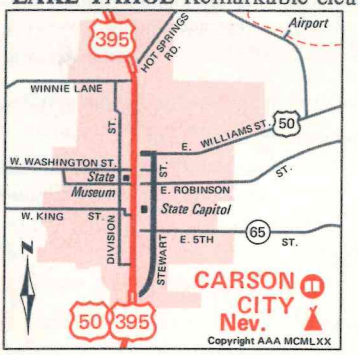
RENO (pop. 72,863). Liberal state laws permit the diversion of an open town, with its varied stage shows and gaming activities operating on a 24-hour basis. Of special interest on the University of Nevada campus are the Atmospherium and Planetarium and the Mining Museum.

VIRGINIA CITY In the 1870's this was the West's mining metropolis. A short film on the history and points of interest of the city is shown in the camera shop, C Street between Taylor and Union Streets.

CARSON CITY (pop. 15,468). Reminiscent of the period of its development, this smallest capital city in the Nation was named for Kit Carson. The original Capitol building, with later additions, is still in use today.

LAKE TAHOE Remarkable clear and deep blue, Lake Tahoe lies in a valley between peaks rising more 4,000 feet.



DEVILS POSTPILE NATIONAL MONUMENT The central feature of the monument is a sheer wall of symmetrical basaltic columns rising as high as 60 feet.

BISHOP (pop. 3,498). Indian Petroglyphs north of Bishop remain a mystery as to age and origin. 77-1 821

BISHOP (pop. 3,498). Indian petroglyphs are found at intervals along Fish Slough Road, a graded earth road north of Bishop and U.S. 6. The age or origin of these rock carvings has never been determined.

BIG PINE Ancient Bristlecone Pine Forest preserves these gnarled trees, some known to be over 4,000 years old—a millennium older than the redwoods.

INDEPENDENCE Eastern California Museum, three blocks west of the courthouse on Grant Street, illustrates the area's history, anthropology, botany and geology.

LONE PINE (pop. 1,241). Mount Whitney (14,495 ft.), the highest mountain in the contiguous United States, rises to the west. A trail leads to the summit; the required wilderness permit may be obtained from the Forest Ranger Station in Lone Pine.

ROSAMOND Burton's tropico Gold Mine, Mill and Museum is 5 miles west on Rosamond Blvd., then ½ mile north on Mojave Tropico Rd. On the grounds are a mine shaft, gold mill, museum of mining relics and a gold camp with historical buildings.

About the Emblem

Long a familiar and trusted insignia along America's highways, the AAA-in-the-oval stands for quality, comfort and service. The American Automobile Association guards closely the integrity of the emblem. Highly trained AAA Field Representatives regularly check the establishments bearing this stamp of approval to see that the standards are maintained. The representatives cover the Nation to set up a network of lodging accommodations, restaurants and campgrounds that meet the varied needs of AAA's 19 million members. Establishments that qualify are listed and fully described in the AAA TourBooks and Camping directories.

Each hotel, motel and resort listed in the TourBooks has met all of AAA's rigid requirements for approval. The quality of these establishments is indicated in the individual listings. All accommodations and campgrounds designated by the AAA emblem and appearing in **boldface** type have expressed a particular interest in serving AAA members. In the Camping directories, a checkmark signifies that the operation is privately owned and has been inspected.

Garages and service stations that display the emblem are under contract; many are bonded to assure reliable service.

Consulting an AAA Travel Counselor will smooth your path by helping you select the best route to your destination, assisting you to plan your driving time and pointing out what to see en route. You will return from your vacation knowing that you have made the best use of your travel time and funds.

Follow the AAA emblem and your counselor's suggestions; both will add to the pleasure of your trip.
